

Just Say "NO" to Reallocation!

Commercial fishermen in the Gulf of Mexico sustainably harvest red snapper for American consumers to enjoy. But now there's a plan to take red snapper away from these hard working fishermen and women. We need your help to protect our businesses and our fishing communities.

What You Can Do To Help

Let the Gulf Council know that you oppose reallocation!

Submit a comment:

http://www.gulfcouncil.org/council_meetings/comment_forms/RF%20Amendment%2028%20-%20Allocation.php

Email the Gulf Council:

gulfcouncil@gulfcouncil.org

Tell them why reallocation is not the solution!

Why Reallocation Is Not The Solution

1. Reallocation will not give recreational fishermen a longer fishing season over time.
2. Hurting our commercial fishing businesses is not the way to help recreational fishermen.
3. Reallocation is not fair to the commercial fishermen that have stayed within our sustainable quotas.
4. Recreational fishermen deserve a management plan that gives them longer seasons, lets them count their fish, and is done sustainably.

Thank you for supporting your commercial fishermen!
